402. There are three main schools of thought regarding the 9/11 attacks. The first theory is the official story, and maintains that 19 Arab fundamentalists executed a surprise attack which caught US intelligence and military forces off guard. The second theory known as Let It Happen argues that certain elements in the US government knew the attacks were coming but consciously let them proceed for various political, military and economic motives; and the third theory Made It Happen contends that certain US government elements actively planned or assisted some aspects of the attacks. Based upon your knowledge of 9/11 events and their aftermath, which theory are you more likely to agree with?

402. There are three main schools of thought regarding the 9/11 attacks. The first theory is the official story, and maintains that 19 Arab fundamentalists executed a surprise attack which caught US intelligence and military forces off guard. The second theory known as Let It Happen argues that certain elements in the US government knew the attacks were coming but consciously let them proceed for various political, military and economic motives; and the third theory Made It Happen contends that certain US government elements actively planned or assisted some aspects of the attacks. Based upon your knowledge of 9/11 events and their aftermath, which theory are you more likely to agree with?

404. World Trade Center Building 7 was the 47-story skyscraper a block away from the Twin Towers that housed the mayor's emergency management center and offices of the SEC, Secret Service and CIA. It was not hit by any airplanes during the September 11th attacks, but still collapsed nearly eight hours later that day. FEMA did not explain this collapse, the 911 Commission ignored it, and the promised official study is now 2 years overdue. Do you think that the 911 Commission was right to concentrate their investigation on the collapse of buildings which were directly hit by airplanes or should they have also investigated the collapse of Building 7?

404. World Trade Center Building 7 was the 47-story skyscraper a block away from the Twin Towers that housed the mayor's emergency management center and offices of the SEC, Secret Service and CIA. It was not hit by any airplanes during the September 11th attacks, but still collapsed nearly eight hours later that day. FEMA did not explain this collapse, the 911 Commission ignored it, and the promised official study is now 2 years overdue. Do you think that the 911 Commission was right to concentrate their investigation on the collapse of buildings which were directly hit by airplanes or should they have also investigated the collapse of Building 7?

405. Some people say that so many unanswered questions about 9/11 remain that the nation needs a new independent investigation of the attacks, including whether any US government officials consciously allowed or helped facilitate their success. Other people say the 9/11 attacks were thoroughly investigated and that any speculation about US government involvement is absurd. Who are you more likely to agree with?
